

EnTech 40 DC Fifth Wheel Compare the difference

EnTech Industries constantly reviews the needs and desires of the dust collector market. When an option for our equipment is brought to our attention, we give it serious consideration. If the proposed option does not negatively affect the function of the machine we will incorporate it.

EnTech is pleased to offer the fifth wheel, tandem axle air brake configuration for the 30DC, 40DC, 60DC and 80DC machines. A similar package is offered for the 12DC and 20DC machines.

Please contact us to discuss your needs.
